

IoT NIDS Dual-Engine Zero-Day Experiments

Direct CLI Command Manual for Team Members (You, Edwin, Anish, Lakshan)

This document lists the **exact 6 commands** assigned to each team member. Each person runs their 6 commands directly in their terminal after pulling the repo (git pull origin main).

■ Your Commands (UNSW-NB15 Dataset - Worms & Shellcode)

```
# 1. Hide Worms (50 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model dual-engine --hide_class Worms --epochs 50 --balance
# 2. Hide Worms (100 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model dual-engine --hide_class Worms --epochs 100 --balance
# 3. Hide Worms (200 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model dual-engine --hide_class Worms --epochs 200 --balance
# 4. Hide Shellcode (50 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model dual-engine --hide_class Shellcode --epochs 50 --balance
# 5. Hide Shellcode (100 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model dual-engine --hide_class Shellcode --epochs 100 --balance
# 6. Hide Shellcode (200 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model dual-engine --hide_class Shellcode --epochs 200 --balance
```

■ Edwin's Commands (CSE-CIC-IDS2018 Dataset - Infiltration & Bot)

```
# 1. Hide Infiltration (50 Epochs)
python train.py --dataset data/CIC_IDS2018_combined.csv --dataset_name CIC-IDS2018 --target_col Label --model dual-engine --hide_class Infiltration --epochs 50 --balance
# 2. Hide Infiltration (100 Epochs)
python train.py --dataset data/CIC_IDS2018_combined.csv --dataset_name CIC-IDS2018 --target_col Label --model dual-engine --hide_class Infiltration --epochs 100 --balance
# 3. Hide Infiltration (200 Epochs)
python train.py --dataset data/CIC_IDS2018_combined.csv --dataset_name CIC-IDS2018 --target_col Label --model dual-engine --hide_class Infiltration --epochs 200 --balance
# 4. Hide Bot (50 Epochs)
python train.py --dataset data/CIC_IDS2018_combined.csv --dataset_name CIC-IDS2018 --target_col Label --model dual-engine --hide_class Bot --epochs 50 --balance
# 5. Hide Bot (100 Epochs)
python train.py --dataset data/CIC_IDS2018_combined.csv --dataset_name CIC-IDS2018 --target_col Label --model dual-engine --hide_class Bot --epochs 100 --balance
# 6. Hide Bot (200 Epochs)
python train.py --dataset data/CIC_IDS2018_combined.csv --dataset_name CIC-IDS2018 --target_col Label --model dual-engine --hide_class Bot --epochs 200 --balance
```

■ Anish's Commands (CIC-IOT2023 Dataset - Mirai-greeth & Vulnerability_Scan)

```
# 1. Hide Mirai-greeth (50 Epochs)
python train.py --dataset data/CICIOT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine --hide_class Mirai-greeth --epochs 50 --balance
# 2. Hide Mirai-greeth (100 Epochs)
python train.py --dataset data/CICIOT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine --hide_class Mirai-greeth --epochs 100 --balance
# 3. Hide Mirai-greeth (200 Epochs)
python train.py --dataset data/CICIOT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine --hide_class Mirai-greeth --epochs 200 --balance
# 4. Hide Vulnerability_Scan (50 Epochs)
python train.py --dataset data/CICIOT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine --hide_class Vulnerability_Scan --epochs 50 --balance
# 5. Hide Vulnerability_Scan (100 Epochs)
python train.py --dataset data/CICIOT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine --hide_class Vulnerability_Scan --epochs 100 --balance
```

```
# 6. Hide Vulnerability_Scan (200 Epochs)
python train.py --dataset data/CICIoT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine
--hide_class Vulnerability_Scan --epochs 200 --balance
```

■ Lakshan's Commands (UNSW & CIC-IOT2023 Datasets - Fuzzers & DDoS-ICMP)

```
# 1. Hide Fuzzers (50 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model
dual-engine --hide_class Fuzzers --epochs 50 --balance
# 2. Hide Fuzzers (100 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model
dual-engine --hide_class Fuzzers --epochs 100 --balance
# 3. Hide Fuzzers (200 Epochs)
python train.py --dataset data/UNSW_NB15_combined.csv --dataset_name UNSW-NB15 --target_col attack_cat --model
dual-engine --hide_class Fuzzers --epochs 200 --balance
# 4. Hide DDoS-ICMP (50 Epochs)
python train.py --dataset data/CICIoT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine
--hide_class DDoS-ICMP --epochs 50 --balance
# 5. Hide DDoS-ICMP (100 Epochs)
python train.py --dataset data/CICIoT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine
--hide_class DDoS-ICMP --epochs 100 --balance
# 6. Hide DDoS-ICMP (200 Epochs)
python train.py --dataset data/CICIoT23_combined.csv --dataset_name CIC-IOT2023 --target_col label --model dual-engine
--hide_class DDoS-ICMP --epochs 200 --balance
```

■ Results Sync Command (All Members After Finishing 6 Runs)

```
python compile_results.py
git add results/
git commit -m "Add completed 50/100/200 epoch LOCO results"
git push origin main
```
